PEACE GARDEN

651 N Orange Grove Blvd.
Pasadena, CA 91103
The Final Design Plan highlights the word 'peace' stretched across the land. It allows for the word to be seen from an aerial view and also for the user to engage in the procession of peace as they walk through the garden. When entering the Peace Garden, the user is greeted by a pond giving a feeling of calmness and a bridge that leads you into the space. The Salam Path is lined with several planting (herbs and spices) that highlight the cities involved in the Silk Road trade route. Other highlights include a fruit tree grove, meditation garden, key hole gardens for vegetable planting, play mound, outdoor classroom, compost bins and a water feature.
